TITLE : PRINTER SYSTEM

ABSTRACT : PROBLEM TO BE SOLVED: To provide a printer system capable of efficiently making operation at a host computer side and a printer side correspond to each other and efficiently execute the operation of the whole system.

SOLUTION: Information data of a page to be displayed on a monitor 3b are transferred to a printer 1 by being synchronized with access by control of a host computer 3 by the access from the host computer 3 to internet 21 and the page to be displayed on the monitor 3b of the host computer 3 is printed as it is by the printer 1. Consequently, transmission of print data of information from the host computer 3 to the printer 1 is unnecessary and displayed information of the monitor 3b of the host computer 3 is immediately printed at high speed.
